

BANSHEE

HIGH PRESSURE NOZZLE

TUBE CLEANING APPLICATIONS

High pressure water acts as a liquid bearing, thereby eliminating ball bearings, seals or lubricant used in conventional rotary tools. Each tool is easily configured to suit any application by choosing from a variety of replaceable heads and inlet options.

- ✓ Unplugging, cleaning and polishing tubes, such as those found in heat exchangers and industrial tube bundles
- ✓ Effectively removes thin, hard scale, carbons, coke and polymers
- ✓ Banshee Beetle models are designed to work around tight radiused bends

Sentinel Automation Technology

BANSHEE

COMPETITION

Tube cleaning tools may look similar on the outside, but it's the engineering on the inside that matters. The patented StoneAge Banshee is the only tool in the industry with a direct path for water flow which is critical to reduce pressure loss and deliver more cleaning power.

For information on compatible Automated Equipment options, please refer to the Automated Equipment Catalog

UP TO 44K PSI (3000 BAR)

BN33 1.5-2.4 in. I.D. Tubes (38-60 mm)

BN27 40K 1.25-2.0 in. I.D. Tubes (32-51 mm)

BN24 1.1-1.8 in. I.D. Tubes (28-46 mm)

BN18 44K 0.87-1.3 in. I.D. Tubes (22-33 mm)

BN18 0.87-1.3 in. I.D. Tubes (22-33 mm)

BN15 0.75-1.2 in. I.D. Tubes (19-30 mm)

BN13 44K 0.60-1.0 in. I.D. Tubes (15-25 mm)

BN13 0.60-1.0 in. I.D. Tubes (15-25 mm)

BN9.5 0.47-0.63 in. I.D. Tubes (12-16 mm)
